MONTHLY DIGEST OF STATISTICS

The Digest, which is prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments, provides industrialists and business executives with invaluable statistics relating to the economic situation in the United Kingdom. Where available pre-war figures are given as well as those for the war years, which were not then published for security reasons. Monthly figures are given for the last two years.

Statistical information is at present arranged under the following headings and the scope is revised from time to time to include new statistical information as it becomes available.

EXPLANATORY NOTES

1. New or Recent Changes in Presentation

(a) *Standard regions*

In Tables **E**, **E1**, **F**, **M**, **BB**, **HH**, **JJ**, **PP**, and **RR** of the present volume the Geographical Regions remain the same as in previous years. In addition, similar tables based on the new constitution of Regions introduced in 1946 and known as "*Standard Regions*" are to be found in the Appendix.

The constitutions of the Geographical Regions and of the Standard Regions are set out on pages *vii* and *viii*.

(b) *Population*

Estimates of total population are not available for Regions or Local Government divisions of the country (see Section 2 below).

(c) *Fertility analyses*

The interval between marriage and maternity in the first year of marriage is divided into periods of 0-8 months and 9-11 months in Tables **PP**, **QQ**, **RR** and **SS**. Table **OO** is extended to detail each month separately.

(d) *New or suspended tables*

Table **N** (Regional analyses of the number of churches, chapels and registered buildings in which marriages could be solemnized) and certain regional analyses of the fertility data (Tables **FF**, **LL**, **NN**, **TT** and **UU**) have been suspended.

2. Populations

The 1946 estimate of the total population of England and Wales shown in Table **A** includes members of its Armed Forces and Merchant Navy at home and overseas; it excludes the Armed Forces of Dominions, Colonies and Foreign countries temporarily present in the country. For years prior to 1940 the figures exclude Armed Forces and Merchant Seamen absent from the country approximating to 180 thousands in recent pre-war years. The national total cannot be apportioned amongst areas within the country.

The national and local estimates of civilian resident populations (Table **E**) are derived from the National Register enumeration of 29th September, 1939, after allowance for subsequent births, civilian deaths, migration, intake into and discharge from the Armed Forces and Merchant Navy obtained from the National Register and other sources of information (see also Note 4 (a) below).

3. Births

Owing to the considerable time lag between the occurrence and the registration of a birth and its variation under War conditions (from a peace time average of about a month to less than a fortnight at the present time), the births recorded and analysed in the Statistical Review in respect of the year or other periods after 1st January, 1941, are those occurring in the period instead of those registered as has been the practice hitherto. For the occurrences of the period 1st July, 1938, to 31st December, 1940, see Tables **YY** in the Reviews for 1938 and 1939 and Tables **EE** and **YY** in the 1940 Review. The numbers Registered in 1946 are shown in the footnote to Table **B**.

For the classification by regions and local areas (Table **E**), the births have been assigned to the home address or area of permanent residence as in previous years.

4. (a) *Birth Rates*

The national rates for 1946 shown in Tables **C** and **D** are obtained by relating birth occurrences to the *total* population, while the rates in Table **E** are based on birth occurrences and *civilian* populations (see Sections 2 and 3 above). After the estimates of local populations had been prepared the national estimate was reduced by 150,000 in the light of later information. The local estimates were not revised and the local birth and death rates based on the populations shown in Table **E** may be slightly understated.

The ratio of the unrevised to the revised national estimate is 1.0037 by which the local rates can be multiplied to compare approximately with the revised national rates shown in the table.

This factor can also be applied to the national, regional and local marriage rates shown in Table **F**.

For the country as a whole the ratio of estimated civilian population to total population is 0.9499 by which the revised live birth rates of Table **E** may be multiplied to produce rates approximately comparable with those of years prior to 1940.

(b) Fertility Analyses

The fertility analyses in Tables **AA-YY** are based on information obtained under the Population Statistics Act 1938 which operated from the 1st July, 1938. Tables **AA** to **SS** are based upon birth occurrences. Tables **VV**, **WW** and **XX** are based upon death registrations.

5. Marriage Rates

The national marriage rates of Tables **C** and **D** are based upon total populations while those of Table **F** are based upon civilian population (*see* Sections 2 and 4 (a) above). For the country as a whole the ratio of estimated civilian population to total population is 0.9499 and the revised rates of Table **F** may be multiplied by this factor to produce rates approximately comparable with those of years prior to 1940.

6. Deaths

The deaths recorded (Tables **E** and **VV** to **XX**) are those registered in the calendar period, the time lag between the date of occurrence and date of registration being usually only a day or two. The said deaths are those of civilians only and are assigned to the area of residence of the deceased.

7. Death Rates

The general death rates of Table **E** are civilian rates based upon civilian deaths and civilian populations (*see* Note 4 (a)). The Infant Mortality rates for the local areas of Table **E** are based upon the combined births of the associated and preceding year to which they relate.

8. Register of Electors

The number of parliamentary electors for each parliamentary constituency showing separately the numbers borne in the Civilian Residence, Service and Business Premises Registers together with the number of votes cast at by-elections held on the October, 1946, Register are set out in Table **V**. The number of local government electors and an analysis of local elections are shown in Table **U**.

9. Changes in Boundaries

Areas in respect of which boundaries have changed during the year are distinguished in Table **E** by the symbol * denoting alteration (*see* also Appendix **Z**).

No populations of areas were affected by changes of boundaries in 1946.

10. Significance Indication

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experience may affect their significance.

11. Regions

The constitution of the Regional Divisions of England and Wales used in the volume is as follows :—

<i>Greater London</i> The aggregate of the City of London and of the Boroughs and County districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946.	<i>North I</i> Durham. * These figures relate to passengers to and from ports in Eire and ports in the United Kingdom. The movement over the land frontier between Eire and Northern Ireland cannot be furnished.

† Approximate figures only.

‡ Excluding air passengers.

§ This figure cannot be reconciled with the separate totals because it includes air movement which cannot be allocated to specific areas.

(c) **Balance of Permanent Migration** : British subjects only (from Board of Trade Returns).
Outward balances are shown in Roman type, inward balances in Italics.

The United Kingdom excludes Eire as from the 1st April, 1923.

The criterion of Permanent Migration is a declared intention to reside for at least a year in the country of destination. The permanent migration of part (c) is included in the passenger movement of part (b), and relates to movement by sea only.

births, sex and whether live or still-born.

Note: The term "Maternity" is used to denote a pregnancy which has terminated in the birth of one or more live or still-born child(ren), the criterion of still birth being that defined in the Births and Deaths Registration Act, 1926. The Maternity record differs from the Birth record in that multiple births from a single pregnancy are counted as one maternity while for the birth record each child born is reckoned as a separate unit.

TABLE OO.—Legitimate Maternities distinguishing the Interval since Marriage.* { England and Wales
1946 Occurrences.

*Note:—Interval since marriage. As the month only and not the day of the mother's marriage is obtained at a birth registration, the interval between marriage and birth of child has been calculated on the assumption that both events take place at the middle of a month; and the true interval may accordingly be a month greater or less than the calculated interval. The groups thus overlap though the records are not duplicated thereby and for statistical purposes the calculated intervals as shown in the tables may be regarded as equivalent to mutually exclusive intervals as follows:—

0 month(s) = 0– $\frac{1}{2}$ month(s).
1 month(s) = $\frac{1}{2}$ –1 $\frac{1}{2}$ month(s).
2 month(s) = 1 $\frac{1}{2}$ –2 $\frac{1}{2}$ month(s), etc.

0 year(s) = 0–11 $\frac{1}{2}$ months.
1 year(s) = 11 $\frac{1}{2}$ months–1 year 11 $\frac{1}{2}$ months.
2 year(s) = 1 year 11 $\frac{1}{2}$ months–2 years 11 $\frac{1}{2}$ months, etc.

TABLE VV.—Infertility of Deceased Married Women } { England and Wales
distinguishing certain Causes of Death. } 1946 Registrations.

Note :—The columns distinguish deaths according to whether the deceased was reported
(a) as having had no children by any husband, i.e. Infertile,
(b) as having had children by a husband, i.e. Fertile.

Deaths in which the record of fertility was not reported are excluded from the table.

In view of the unreliability of inferences based upon small numbers, proportions based on less than 50 cases (Infertile plus Fertile) have been omitted, and proportions based on between 50 and 250 cases are shown in italics.
